### About

Frontend Developer with 5+ years of experience crafting responsive, intuitive, and accessible websites and web applications. Skilled in HTML, CSS, JavaScript/TypeScript, and React, with a keen eye for detail and a strong focus on delivering seamless user experiences. Enthusiastic about tackling challenging problems and translating complex requirements into elegant, user-centric solutions.

### Experience

#### 07.2022 - Current - EPAM, Software Developer (New York, USA)

- Developed and maintained a high-performance e-commerce web application, focusing on building scalable and seamless user interfaces.
- Identified bottlenecks in critical user flows to reduce errors and increase conversion rates. Utilised Amplitude and DataDog for data analysis.
- Collaborated with a cross-functional, international team to ensure seamless integration and consistent performance across the application.
- Conducted interviews, code reviews, and provided mentorship to newcomers, ensuring high code quality and helping with onboarding processes.
- Participated in Agile methodologies, contributing to sprint planning, daily stand-ups, and retrospectives to improve team efficiency and product quality.
- Wrote unit tests to maintain code integrity and prevent regressions. Added 20% more tests to reach a goal of 80% code coverage.

#### 10.2020 - 07.2022 - CITIBANK, Frontend Developer (Moscow, Russia)

- Maintained and enhanced web application (fintech) focusing on feature development and refactoring legacy codebases. Reduced legacy code base by 35%.
- Integrated TypeScript into a Citi Bank project, significantly improving code reliability and reducing bugs. Trained and mentored team members on proper TypeScript usage. Implemented bug-tracking integrations to identify new bugs and track existing ones. As a result, the completion rate of user flows increased from 70% to 90% on average.
- Developed a React Native HR app as an internal project, streamlining internal processes and showcasing innovation beyond assigned tasks.

#### 2019 - 2020 - CoffeeCup, Web Developer

- Developed a custom web application for a local coffee shop using the MERN stack (MongoDB, Express, React, Node.js), enhancing customer engagement. The app was receiving customer phone numbers, counting visits, and offered a free cup of coffee on every 6th visit, significantly increasing the number of regular customers.

### Skills

- Javascript, Typescript, React, HTML5, CSS3, NextJS, Vue2/3, Node.js
- React Query, Redux, Redux-Toolkit, Redux-thunk, React testing library / Jest
- Vite, Esbuild, React-Native, Vuex, AgGrid, React Charts, Webpack, Babel
- Express.js, Socket IO, MongoDB, SCSS, ShadCN, Radix-ui, Bootstrap, Material, Tailwind CSS, Styled-components
- REST API, NPM, YARN, Docker, Git, Yarn Workspaces, Lerna, Turborepo

### Education

- Udemy courses of React (2019)
- Krasnodar State University (Krasnodar, Russia) 2011-2015, Applied Mathematics

### Languages

- English (B2+)
- Spanish (A1+)
- Russian (native)
- Ukrainian (B2)
